

Release date: 29 August 2008

## FP cables just a click away

Prysmian has developed an effortless way to search for your nearest stock of fire performance cables with its easy to use stockist locator tool, a new feature of [www.fpcables.co.uk](http://www.fpcables.co.uk).

Prysmian's FP cables and accessories are available nationwide through a network of over 2000 stockists including independent outlets as well as national chains. Simply go to [www.fpcables.co.uk](http://www.fpcables.co.uk), type in your postcode, town or county and you will receive a list of your nearest stockists with their contact details, address and, if required, where they are located on an easily readable map.

Many wholesalers have a readily available stock of popular products such as FP200 Gold and are able to provide lead times on more project specific cables and accessories. For specialist armoured power cables such as FP400 and FP600, there is a dedicated page advising which specific stockists are able to supply them.

Julie Mould, marketing manager at Prysmian, comments, "Contractors and installers working anywhere in the country need to be able to locate FP cables quickly and

easily and this new tool has provided a straightforward means for them to do so. Fpcables.co.uk aims to provide a totally comprehensive online resource about fire performance cables and systems and we will be adding new sections on an ongoing basis to meet all the needs of our customers. “
