

Release Date: 10 August 2009

Training from the Cabling Experts

Prysmian Cables & Systems is able to offer customers anywhere in the UK, free on-site training on all aspects of fire performance cable specification and regulations.

The training seminars are designed to keep M&E design engineers and specifiers up to date with all the regulations affecting fire performance cabling systems, relevant standards, products and their applications. Seminar sessions are interactive and informal and can be tailored to meet individual customer requirements.

“Recent expansion of our training team means that we’re now able to take our training seminars to customer sites anywhere in the UK and Isle of Man,”

explains Prysmian marketing manager, Julie Mould. "With over 30 years market leading experience in the fire performance cable market, Prysmian's technical expertise in this area is second to none."

Three different training topics are offered:

- 1) Recent changes in British Standards looking specifically at BS5839-1:2002+A2:2008, the standard that applies to the installation of fire detection and alarm systems for buildings
- 2) Specification for cable systems, specifically BS7346-6:2005, components for smoke and heat control systems
- 3) A new approach to mechanically and electrically protected, IEE Wiring Regulations compliant cables for use in thin walls and partitions (clause 522.6 of 17th Edition)

To enquire about Prysmian's free fire performance cable training seminars contact the marketing department on 023 8029 5029 or email cables.marketing.uk@prysmian.com

Note to editors

A leading player in the industry of high-technology cables and systems for energy and telecommunication, the Prysmian Group is a truly global company with sales exceeding Euro 5 billion in 2008 and a strong position in higher value-added market segments. With its two businesses, Energy Cables & Systems (submarine and underground cables for power transmission and distribution, for industrial applications and for the distribution of electricity to residential and commercial buildings) and Telecom Cables & Systems (optical cables and fibres and copper cables for video, data and voice transmission), Prysmian boasts a global presence with subsidiaries in 38 countries, 53 plants in 21 countries, 7 Research & Development Centres in Europe, USA and South America, and over 12,000 employees. Specialising in the development of products and services designed to meet customers' specific requirements, Prysmian's key strengths include: a focus on Research & Development, the

capacity to innovate products and production processes, and the use of advanced proprietary technologies. Prysmian is listed at the Milan Stock Exchange in the Blue Chip index.

Prysmian is a member of the British Cables Association (BCA), which is the trade association for British Manufacturers and Associate Companies manufacturing insulated cables, wires and accessories. For further information please see www.bcauk.org
